SPECIFICATION NOTES

- No shock-performance rating is supplied with the material. Any such rating belongs to the installed system — pad, infill, and base supplied by others — and is established by testing the finished field.
- Pad, infill, and base are supplied by others and are required for the surface to perform as specified.
- All figures are nominal manufacturing values subject to normal production tolerance. Slight variation in thatch texture and dye lot color between rolls is expected and is not a defect.
- Superior Turf Direct supplies materials only and does not perform installation. Base design, compaction, and installed drainage are the responsibility of the installing contractor.
- Order the full job together and run every piece in the same pile direction. A reversed piece reads as a color change.
- Compliance statements reflect the manufacturer's declaration. Third-party lab reports are available on request.
