SPECIFICATION NOTES

- Performance in a pet area is a function of base drainage, infill selection, and cleaning practice — not of the turf itself. We make no odor-reduction claim for any product.
- Drainage is by permeable backing. No flow figure is published for this product; installed performance is governed by the base and sub-base designed by others.
- Published total product weight is 88 oz/sq yd; listed component weights sum to 87 oz/sq yd. The variance is under confirmation with the manufacturer.
- Commercial kennel, boarding, and daycare runs fall under a separate warranty tier. Confirm coverage with your rep before quoting.
- All figures are nominal manufacturing values subject to normal production tolerance. Slight variation in thatch texture and dye lot color between rolls is expected and is not a defect.
- Superior Turf Direct supplies materials only and does not perform installation. Base design, compaction, and installed drainage are the responsibility of the installing contractor.
- Order the full job together and run every piece in the same pile direction. A reversed piece reads as a color change.
- Compliance statements reflect the manufacturer's declaration. Third-party lab reports are available on request.
